

The Society of American Military Engineers leads collaborative efforts to identify and resolve national security infrastructure-related challenges. **Founded in 1920**, SAME unites public and private sector individuals and organizations from across the **architecture, engineering, construction, environmental and facility management, cyber security, project planning, contracting and acquisition, and related disciplines** in support of national security.

## Our Mission

To promote and facilitate engineering support for national security by developing and enhancing relationships and competencies among uniformed services, public- and private-sector engineers and related professionals, and by developing future engineers through outreach and mentoring.

# **Presentations from Past Events**

## **2016 Meet the Chiefs**
